

Gustavo de Araújo Vieira

Support Analyst

Imperatriz, Maranhão, Brazil | +55 99 99186-6074 | ggdevs77@gmail.com | linkedin.com/in/gustavo-vieira-42a16b387

Professional Summary

Support Analyst and graduate in Analysis and Systems Development (ADS), with solid experience in L2 support, high-complexity troubleshooting, and customer-focused service. Technical expertise bridging infrastructure and development, with hands-on experience in Python, SQL Server, and process automation. Skilled in system implementation and user training, with a strategic advantage in tax legislation (SPED/ICMS). Recognized for proactivity in creating internal tools to optimize workflows and reduce support tickets, seeking to apply analytical skills in high-performance technological environments.

Skills & Competencies

- Technical Support: Advanced computing (hardware and software), problem solving, L2 support
- Tools & Systems: Office Suite, Databases, SQL, Python, React, SaaS, Zabbix, Zendesk, Nagios
- Functional Skills: Customer service, organization, attention to detail, multitasking
- Soft Skills: Communication, proactivity, problem-solving focus, interpersonal skills

Professional Experience

Support Analyst | MaxData Sistemas

06/2025 – Present

- Responsible for internal and external installations, ensuring proper system operations.
- Provided L1 and L2 support and customer training, ensuring problem resolution and satisfaction.
- Applied agile methodologies, such as the Ishikawa diagram, to optimize service efficiency.
- Created an intranet forum for troubleshooting and sharing solutions, helping new and veteran employees.

Printer Operator | Ricoh Ltda

02/2024 – 10/2024

- Monitored supplies and operational status of printers, ensuring availability and preventing failures.
- Managed processes using automated Excel spreadsheets, optimizing speed and efficiency.
- Implemented a new ticketing and monitoring control system, improving regional management.

IT Technician | SOS Celulares e Informática

02/2021 – 01/2022

- Provided customer service, resolving inquiries and technical issues efficiently.
- Performed assembly and disassembly of computers and smartphones, demonstrating hardware knowledge.
- Assisted in administrative operations management and event coordination, developing organization and multitasking skills.

Education

Analysis and Systems Development (ADS) — Graduate | FAMO - Faculdade de Tecnologia Porto das Monções

02/2022 – 06/2024

Relevant Projects

Nexus Optimizer Pro — Developer

Created a system and hardware optimization suite for Windows, developed in Python with a focus on user experience (UX) and security. Features real-time process monitoring, Windows Registry (Regedit) manipulation for software management, network route injection via PowerShell, and asynchronous execution of deep cleaning routines. Actively version-controlled via Git/GitHub.

Personal Portfolio — Developer

Developed a web portfolio focused on creative UI/UX, simulating a terminal (Hacker/CLI) environment. Built with React.js and Tailwind CSS, applying componentization, state control for an interactive functional terminal, and image gallery modals. Versioned via Git with cloud hosting and automated deployment through Vercel and GitHub.

Corporate Incident Management Portal and Knowledge Base (ERP) — *Developer*

Full-stack development of a system to optimize triage and support of technical tickets. Built with a Python (Flask) back end and PostgreSQL relational database, running on a WSGI server (Waitress) to support high concurrency on a local network. Features an asynchronous front end (single-page application with vanilla JavaScript), optimized media management to prevent database bloat, and RESTful API integration for real-time efficiency metrics and SLAs through Power BI, merging software engineering and data intelligence in operations.

Certifications

- Database with Java Course — Unieducar
- Introduction to Algorithms and Basic Programming with Java Language Course — Instituto Federal Minas Gerais
